

# 26-2 통사론 스터디 트리 구조 연습

언어학과 이승현

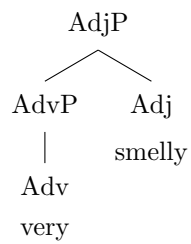

August 19, 2026

## Contents

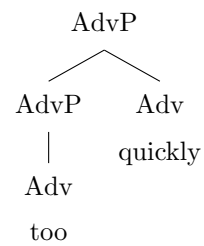

|                                                       |    |
|-------------------------------------------------------|----|
| chpt 3. Constituency, Trees, and Rules                | 2  |
| chpt 4. Structural Relations                          | 16 |
| chpt 5. Binding Theory                                | 16 |
| chpt 6. X-bar Theory                                  | 16 |
| chpt 7. Expanding X-bar Theory                        | 16 |
| chpt 8. Constraining X-bar: Theta Theory              | 16 |
| chpt 9. Theta Grids and Functional Categories         | 16 |
| chpt 10. Head-to-Head Movements                       | 16 |
| chpt 11. DP Movement                                  | 16 |
| chpt 12. <i>Wh</i> -Movement and Locality Constraints | 16 |
| chpt 13. A Unified Theory of Movement                 | 16 |
| chpt 14. Ditransitives                                | 16 |
| chpt 15. Raising, Control, and Empty Categories       | 16 |

### chpt 3. Constituency, Trees, and Rules

- chpt 4. Structural Relations
- chpt 5. Binding Theory
- chpt 6. X-bar Theory
- chpt 7. Expanding X-bar Theory
- chpt 8. Constraining X-bar: Theta Theory
- chpt 9. Theta Grids and Functional Categories
- chpt 10. Head-to-Head Movements
- chpt 11. DP Movement
- chpt 12. *Wh*-Movement and Locality Constraints
- chpt 13. A Unified Theory of Movement
- chpt 14. Ditransitives
- chpt 15. Raising, Control, and Empty Categories
